

2023 Abridged Select EX Formulary

The following is a list of the most commonly prescribed brand and generic medications. It represents an abbreviated version of the formulary list that is at the core of your prescription drug benefit plan. The list is not all-inclusive and does not guarantee coverage. Some preferred medications overlap with other clinical programs and may not be covered. In addition to drugs on this list, the majority of generic medications are covered under your plan and you are encouraged to ask your doctor to prescribe generic drugs whenever appropriate. The Elixir Pharmacy & Therapeutics (P&T) committee is responsible for the development and maintenance of the formulary. The committee is comprised of independent practicing physicians and pharmacists from a wide variety of medical specialties. The formulary is reviewed and updated as new drugs or new prescribing information becomes available. Factors which affect decisions regarding the formulary include safe use, clinical efficacy, and therapeutic need. Only after those factors are assessed is cost considered. Compliance with the formulary is important for improving quality of care and restraining health care costs. A copy of this formulary document is available at elixirsolutions.com.

PLEASE NOTE: Preferred brand drugs may move to non-preferred status if a generic version becomes available during the year. Any medication newly approved by the FDA will not be covered until reviewed by the Elixir Pharmacy & Therapeutics (P&T) committee. Not all drugs listed are covered by all prescription drug benefit programs. Certain utilization edits and criteria may apply. For specific questions about your coverage, please visit elixirsolutions.com. *Effective 1/1/23.*
